

The most comprehensive fraud protection
solution available, virtually eliminating card-not-present fraud.

0.01% 0.2%
chargebacks / false positives

- **\$32 BILLION** – US Retailers lost to Fraud in 2014
- **1.5%** – of legitimate transactions rejected
- △ **27%** – of transactions are reviewed manually

▲ **45%** of all fraud occurs online and that is expected to grow as card security is added to brick & mortal store payments in the USA this October. *(more the 50% of credit card fraud occurs in the US)*

▲ **EMV effect on CNP fraud:**
Australia – up over 50%

▲ **UK – CNP fraud up 79%**

● Online (CNP) ● Counterfeit ● Lost / Stolen ● Other

Source: Aite Group, "EMV: Lessons Learned and the U.S. Outlook," June 2014

Merchants lose on average of \$2.21 to fraud per a **\$78.30 transaction**:

-  Online Fraud cost the merchant an average of **\$0.70 per a transaction.**
-  Lost Revenue costs the merchants an average of **\$1.17 per transaction.**
-  Manual Review cost the merchant an additional **\$0.34 per a transaction.**

Commission:

20% year one

10% after year one

**Partner will receive their first commission within 30 days of the close of the client's first billing cycle.*

***Payouts will continue on a monthly basis for the life of the deal.*

— Chargebacks to **0.01%** (*fraud*)

— False Positives to **0.2%**

△ Eliminate Overhead

△ Reduce Systems Costs

✓ **No Manual Review:** Never personally review a transaction ever again! NoFraud will contact cardholders directly to confirm purchases, if necessary. Eliminate human error and overhead.

✓ **A Fully Managed Solution:** No complicated configurations, risk thresholds, or scoring models for merchants to configure.

✓ **No Training or Maintenance Cost:** NoFraud sets up in 10 minutes, and does not require training or dedicated staff to run or maintain.

— Cutting Chargebacks to 0.01%

NoFraud adapts to new fraudulent trends, by incorporating virtually every fraud detection technology available in a multi-layered approach fusing advanced learning algorithms with human intelligence.

- **Fraud Linking:** Device Fingerprinting, IP Tracking, Proxy Piercing, Global Black Lists, Merchant Black Lists, etc.
- **Behavior Analysis:** Geo-location, Transaction Velocity, Cross-Transaction Monitoring, High-Risk Order Characteristics, Persona Analysis.
- **Data Validation:** Address Verification Service (AVS), Card Verification Number (CVN), Bank Identification Number (BIN), Social Media Profile Information.
- **Human Oversight:** Being agile and ready to adapt at the first sign of new fraudulent trends.

— Reducing False Positives to 0.2%

- ✓ **Cross-referencing:** Collecting data from several of the largest international databases ensures that the latest data is being used before a customer is ever declined.
- ✓ **Built-in CVN/AVS:** Allowing us to approve orders that have a typo in the CVN or billing address (in many cases).
- ✓ **Live Cardholder Verification:** NoFraud contacts customers directly to confirm that an order is legitimate when a risky transaction has verifiable contact info.
- ✓ **Manual Oversight:** Over 80% of declined transactions get eyeballed by an expert, ensuring nothing gets overlooked.

Eliminate Overhead / Reduce Systems Costs

- ✓ No Setup Fees
- ✓ No Commitments
- ✓ No Subscription Fees
- ✓ No Monthly Minimums
- ✓ Competitive (*per Transaction*) Pricing

1. Get started by simply changing your **Gateway URL** to run transaction data through NoFraud.

2. Add your **API Login ID**, to make the connection and you're set to go.

* **Optional:** Device fingerprinting requires the installation of a small, preset JavaScript.

The screenshot shows the Authorize.net merchant interface. The 'Gateway URL' field is highlighted with a red box and a blue arrow pointing from the first instruction. The 'API Login ID' field is also highlighted with a red box and a blue arrow pointing from the second instruction. Other fields visible include 'Enabled' (Yes), 'Title' (Credit Card), 'Payment Action' (Authorize and Capture), 'Transaction Key' (masked), 'New Order Status' (Processing), 'Test Mode' (No), 'Accepted Currency' (US Dollar), 'Debug' (No), 'Email Customer' (No), 'Merchant's Email' (empty), and 'Credit Card Types' (American Express, Visa, MasterCard, Discover).
