Competitive Summary

Messaging

- Messaging across the selected competitors refer to the increase in sales a client can expect.
- Synonymous phrases used to convey winning against fraud:
 - “Beat Fraud”
 - “Fraud Prevention”
 - “We will fix it [fraud] quickly”
 - “Say Goodbye To False Positives”
 - “Increase approvals”

Content

- Interactive infographics can promote aspects of the product:
 - Process
 - Integration
 - Automated systems
- Simplification of technology features are more engaging for the average user.
- Testimonials & Case Studies can build trust with users.
- Webinars can be used to showcase expertise.

CTAs & Conversions

- Keeping all CTAs’ color and size consistent will mitigate user confusion
- CTAs must be appropriately placed as not to become lost in background colors or text
- Gated content provides opportunities for email capture

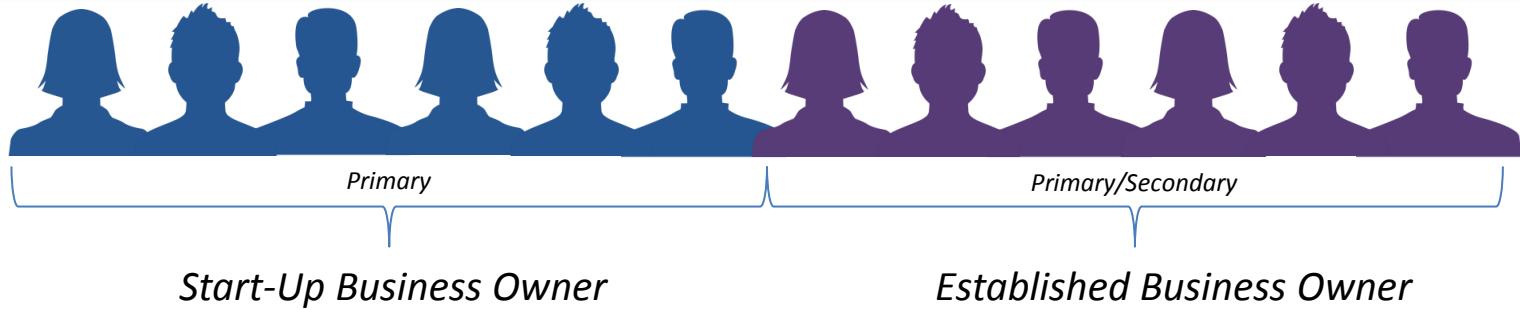

Interesting features

- ROI Calculator provides users the ability to check the amount of money they may be losing to fraud and can elicit a final user conversion.
- Free fraud world tours provide a chance for No Fraud to participate in offline marketing

Audience Summary

Drivers to Website

- To research fraud prevention options
- Have a desire to start a new business off on the right foot
- To mitigate time spent manually reviewing flagged orders
- Price shopping

Content Needs

- Comprehensive info that simplifies and showcases technology
- Benefit of using No Fraud as opposed to competitors
- Integration process
- Pricing information
- Testimonials, press, case studies

Drivers to Website

- To replace fraud prevention tool/service
- To cut current fraud prevention costs
- To replace fraud prevention measures without disrupting workflow

Content Needs

- Benefit of using No Fraud as opposed to competitors
- Integration process
- Pricing Information
- Testimonials, press, case studies

Messaging

Brand Pillars

Messaging should reflect No Fraud's advantages to build trust with users and establish superiority in the market.

Premium Service

No Fraud is not just a piece of technology, we are a team of fraud prevention experts!

Innovative Technology

Incorporating the technology of our competitors combined, we deliver the most advanced system of fraud prevention.

Seamless Integration

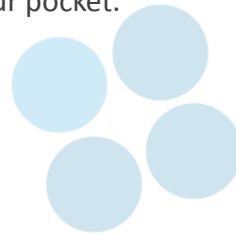

Ten minutes to integrate our system and a lifetime to forget about fraud.

Cost-Effective

Technology that pays for itself. Beating fraud means more money in your pocket.

Note: All messaging on this slide is conceptual and intended to introduce consecutive messaging slides.

Audience-Specific Messaging

Start-Up

Established

Price-conscious

Overwhelmed

**Inexperienced
with fraud**

- Integrate our system in 10 minutes and forget about fraud for good
- Our service is competitively priced so you can rake in your revenue without losing it to fraudsters
- Fraudsters don't deserve the money you've made so shut them down
- Your legitimate customers may be denied by other fraud detection technologies, but not with No Fraud

- No Fraud means every fraud detection technology available
- Your workflow will never be interrupted
- Manual review is a thing of the past – make up for the time you lost
- We know fraud, you know your business – we'll keep the fraudsters at bay

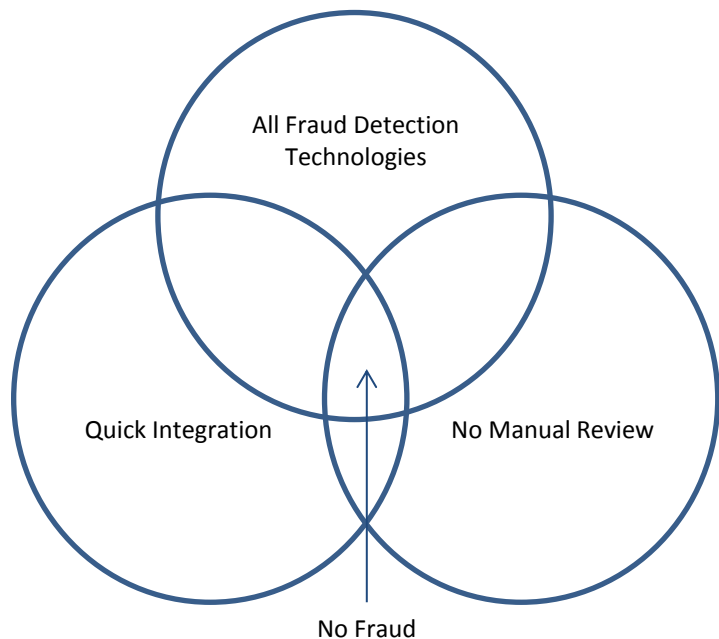

Quality-conscious

Conservative

**Experienced
with fraud**

Homepage messaging

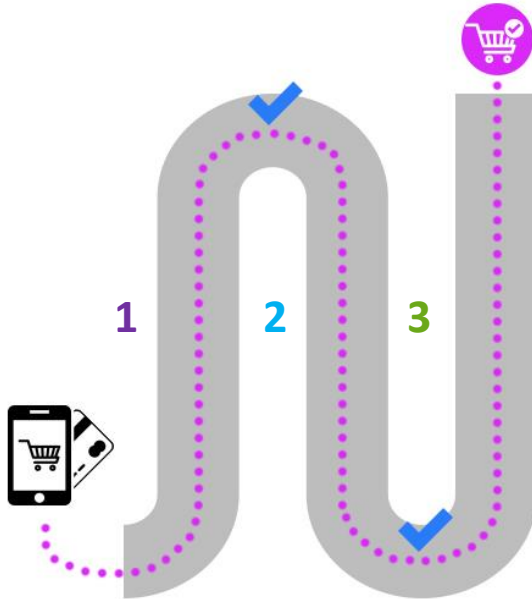

Introducing a fraud prevention service that knows your time is priceless.

No Fraud's technology has the combined power of every fraud preventative measure, optimized to eliminate fraud and false positives – your legitimate customers will be pleased and you'll have more time to invest in your business.

Technology Messaging – Levels of Prevention

Although there are thousands of data points to consider, condensing them into three “levels of fraud prevention” will simplify tech capabilities.

Persona Analysis

As your client's information flows into our system it validates their credit card (AVS and CVV is built-in), bank identification number, transaction velocity, online behavior and a myriad of other data points.

Dynamic Monitoring

Our fraud detection doesn't end with the information a would-be fraudster could have supplied. The next level of defense includes IP geo-location and Device ID confirmation, effectively monitoring location and device anomalies.

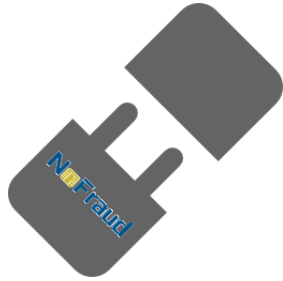

Digital Identification

The final verification process scans through a users social media accounts, email history, and other information available across the digital landscape. In the end an order is either approved, declined, or placed in a review state where our fraud specialists step in.

Technology Messaging – Seamless Integration

Set. Forget. Grow your business.

With No Fraud there is no coding or technical expertise required and no testing or customization period.

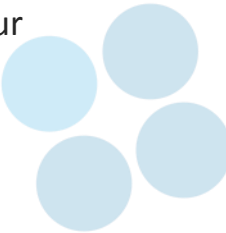

Fastest Integration in the Industry

- Go live in 10 minutes!

Easiest Integration in the Industry

- All you have to do is change your gateway URL and provide us with your API login ID.

Technology Messaging – Human Intelligence

The most effective fraud prevention to date begins with our tech and ends with our expert staff.

No Fraud is an automated system but there are elements that require some human interaction.

Transaction Monitoring

- Transactions placed in the review state are reviewed by our team.
- Just about every approved and declined transaction is looked over by our team.

Live Cardholder Verification

- We are the only fraud company that contacts your customers directly to confirm the legitimacy of an order.

White/Black Lists

- As a client you have access to your account and can make the decision to approve or decline specific transactions.

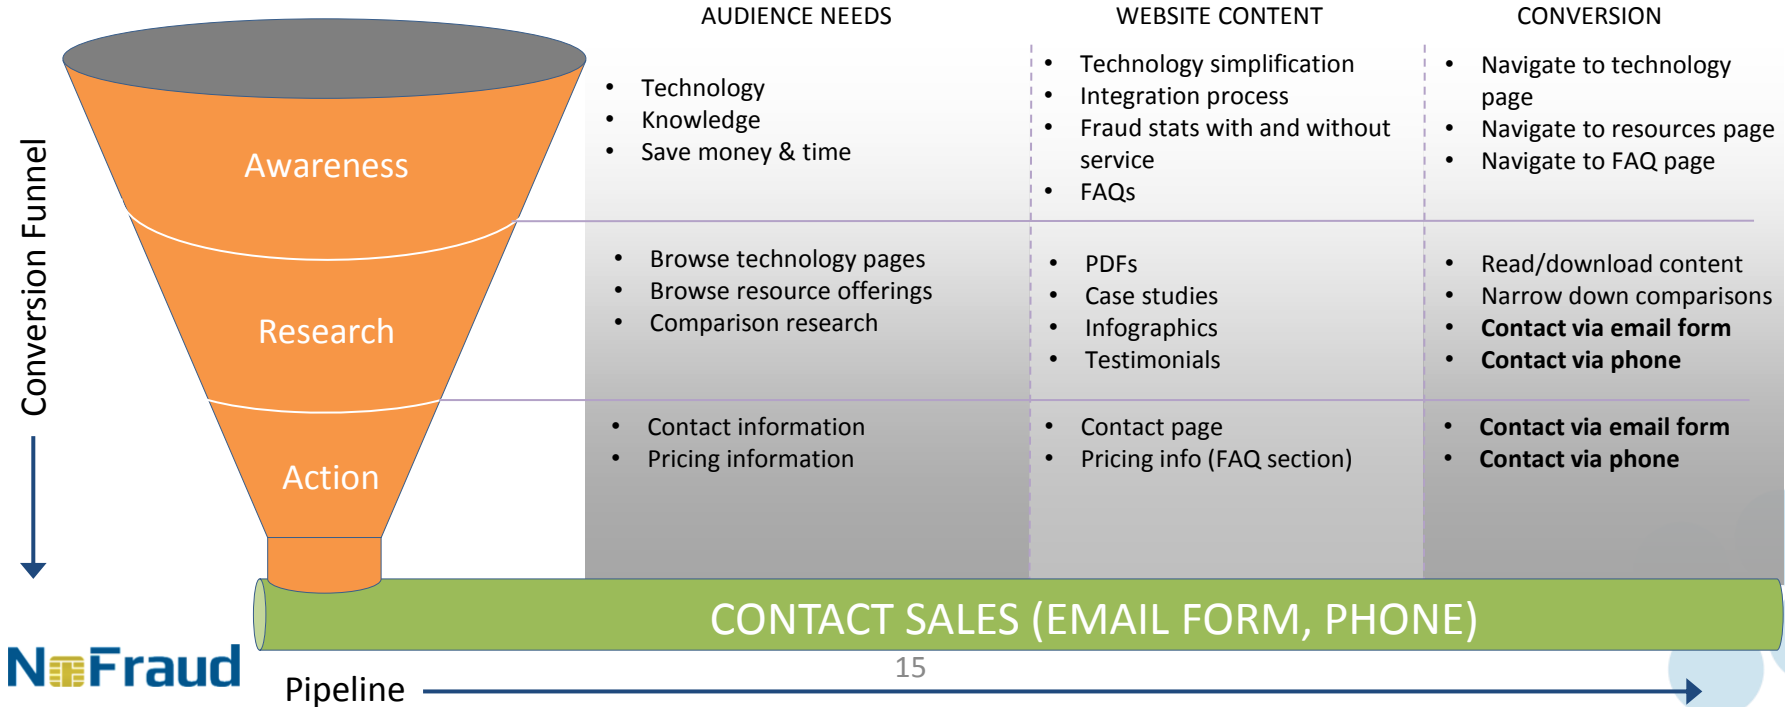

Conversion Funnel

Conversion Funnel

CHALLENGE: Generate highest potential for contacts

SOLUTION: Provide information in a compelling manner, provide sufficient opportunities to contact

Conversion Pathways

Conversion Pathways

Green italic = Conversion Point

Finds No Fraud (highly reviewed) in consumeraffairs.com's top ten "Fraud Prevention Companies"

Reads through reviews and decides to click on the link, reads homepage messaging, *navigates to ROI Calculator*

Uses ROI calculator and realizes how cost-effective No Fraud's system really is

Clicks sidebar phone contact and makes contact with No Fraud's sales team

Finds No Fraud through google organic search, Clicks "Our Advantages" and reads through No Fraud's advantages

Clicks "Technology" and reads the overview message, clicks "Levels of Prevention" for more information

Reads through the levels of fraud prevention and is impressed, but has a question before moving forward

Clicks sidebar email contact and fills name, business, email address, and question

Receives a referral from a friend using No Fraud. Directly searches No Fraud on google

Reads homepage messaging then clicks technology. Reads main messaging and is intrigued (comforted) by the *"Human Intelligence" section, clicks for more information*

Is interested in the service since it isn't too much of a stretch from an internal fraud team, but much cheaper – *checks FAQ for pricing information*

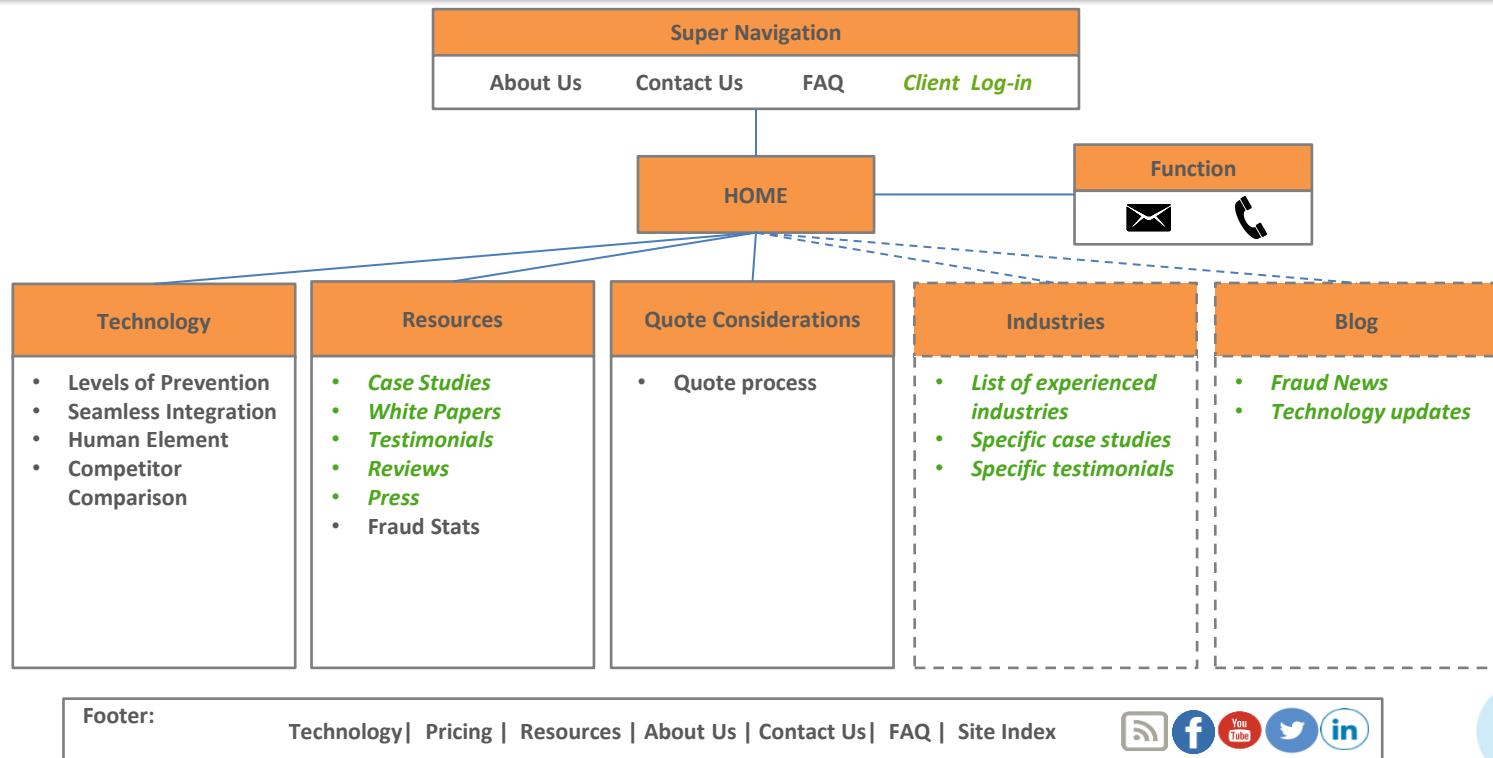

Finds that No Fraud is the cheaper option compared to his internal fraud team – *clicks sidebar phone contact and calls*

Homepage & Landing page treatments

- Page Title
- Logo
- Tagline
- Messaging

Main message alternatives:

- “Fraud is at an all time high, and it takes careful research to keep it at bay”

The screenshot shows the NoFraud Resources page. At the top left is the NoFraud logo and a hamburger menu icon. To the right are links for 'About Us', 'Contact', and 'FAQ'. The main heading is 'Resources'. Below it is a large text block: 'Fraud is becoming more and more elusive, but fraud detection technology is making advancements.' To the right of this text are two icons: an envelope and a telephone. Below the text is another paragraph: 'Our process is so effective that many of our clients forget fraud exists and because our technology is always learning and improving itself, fraud will stay forgotten.' To the left of this paragraph is a vertical stack of four circular icons: a magnifying glass, a person, a document, and a lock. Below the main text block are four orange buttons: 'Case Studies', 'News & Press', 'Testimonials', and 'Fraud Stats'. At the bottom is a blue footer bar with the word 'Footer'.

Annotations with lines pointing to specific elements:

- Line from 'Elements on the page:' to the NoFraud logo.
- Line from 'Elements on the page:' to the hamburger menu icon.
- Line from 'Elements on the page:' to the first circular icon (magnifying glass).
- Line from 'Main message alternatives:' to the main text block.
- Line from 'Main message alternatives:' to the second circular icon (person).
- Line from 'Main message alternatives:' to the third circular icon (document).
- Line from 'Main message alternatives:' to the fourth circular icon (lock).
- Line from 'Main message alternatives:' to the 'Case Studies' button.
- Line from 'Main message alternatives:' to the 'Fraud Stats' button.

1.91%
of customers complete the purchase

Fraud related conversion rate loss:

43%
3D Secure conversion rate drop

10%
of internal reviews reject orders which are actually genuine

11%
shopping cart abandonment due to payment decline

Competitive Analysis & Audience Analysis

Competitive Analysis

Competitive Snapshot

The snapshot below illustrates key competitor's performance across Organic and Paid Search* and Social Media

Brand	Organic Keywords	Sample Keywords (position)	Monthly PPC Spend (Est)	Paid Search	FB Fans	Twitter Followers	LinkedIn
Kount	1,100	fraud seminars (19), fraud detection software (21), chargebacks (28)	\$2,400	\$2,200	0	806	1,236
Forter	190	jomashop (26), fraud trends (5), ecommerce fraud protection (47)	\$137	\$0	421	233	806
Trustev	104	anti fraud technology (34), types of online fraud (89),	\$0	\$411	1,706	3,178	1,499

*Based on data from SEMRush

Competitor Analysis – Forter

Messaging

- “Frictionless Fraud Prevention: Increase approvals. Delight customers. Grow sales.”

Content

- Interactive infographic promoting automated system
- Customer story highlighting process (case study)
- Consolidation of tech features into three categories: elastic identity, cyber intelligence, and behavioral analysis

CTAs & Conversions

- All CTAs are green: Learn More, See Results, Send
- “Learn More,” email capture, in top-right navigation is sticky
- Inconsistent use of color across website

Interesting Feature

- ROI Calculator informs users the potential increase in annual revenue and the potential reduction of annual expenses

Competitor Analysis – Kount

Messaging

- “Boost Sales. Beat Fraud”

Content

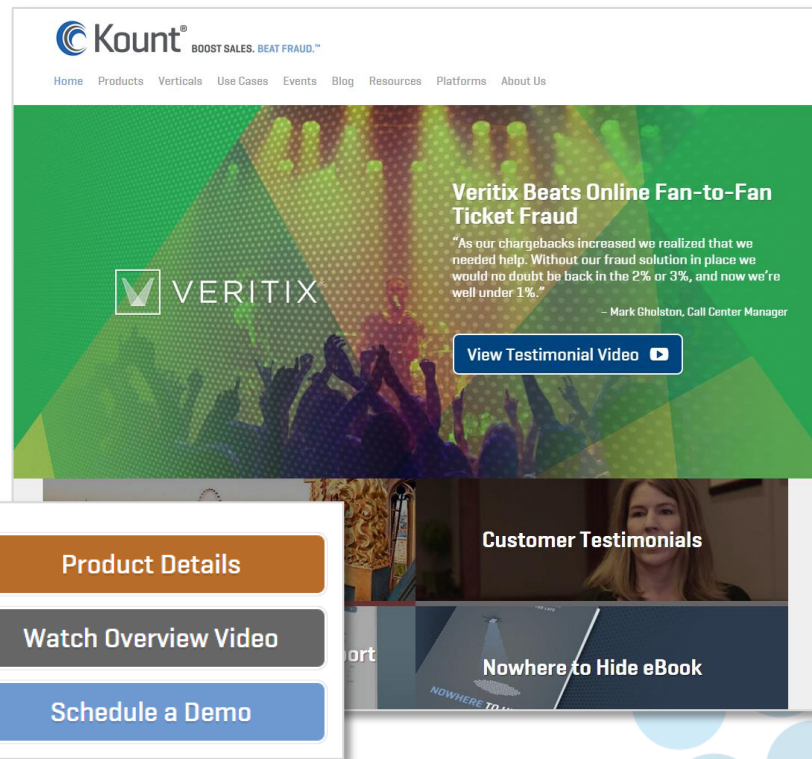

- Offers ebooks that promote fraud expertise and provides another form fill for database growth
- Testimonials in the form of written reviews and videos
- Case studies are downloadable which make them easy to share
- Webinars showcases expertise in the industry
- Blog is not very active but posts are being shared

CTAs & Conversions

- Blue CTAs on blue backgrounds are ineffective
- Too many CTA colors causes confusion
- “Home” button is a waste of main navigation realty

Interesting Feature

- Sponsor of Fraud360, a free fraud seminar world tour

Competitor Analysis – Trustev

Messaging

- “5% of revenues and 2% of margins are lost due to e-commerce fraud. We can fix it quickly.”

Content

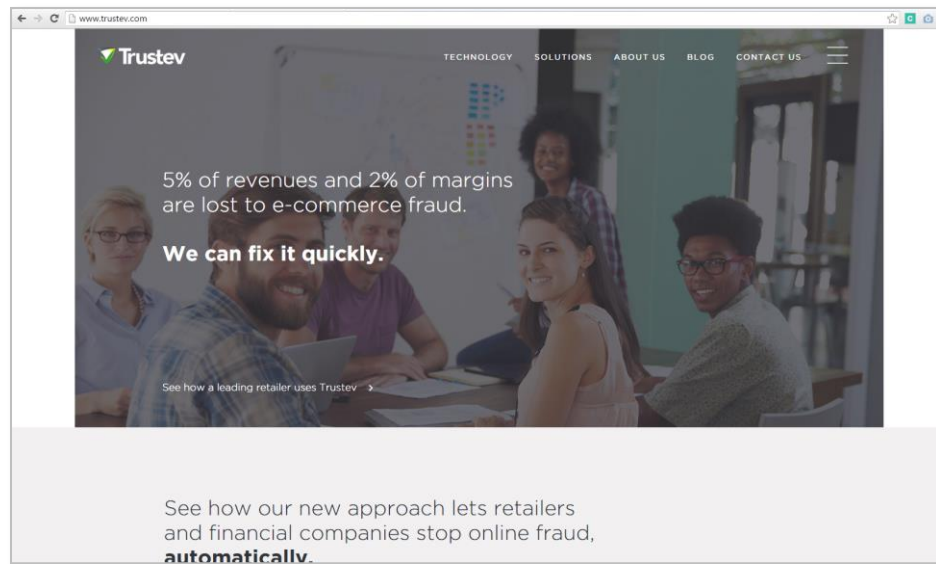

- Offers a free 2 page analysis of a company’s “upside” for email
- Focus on showcasing human element of company promotes a personable, warm tone
- Tasteful use of icons throughout the site

CTAs & Conversions

- All CTAs are grey – a color easily lost within a pallet of blues and greys.

Interesting Feature

- Sends a free analysis of a company for an email address.

Audience Analysis

Audience Profiles

Start-Up Business Owner

A new business owner has a lot on their plate. Many new business owners are not yet aware of the magnitude of online fraud. They need to manage their time wisely and focus on building up their company.

Qualities:

- Overwhelmed with new business responsibilities
- Price conscious shopper
- Not a fraud expert
- Does not have fraud expert staff

- Interested in latest technology
- Will appreciate “time-saving” products the most

How to gain these leads?

- Through social media – paid social media targeting relevant groups
- Paid Search – long-tail keywords that capture online researchers

Established Business Owner

An established business owner, especially a successful one, understands the impact of online fraud. They may already have fraud protection integrated into their systems and managed by a department of workers.

Qualities

- Familiar with business responsibilities and workflow
- Quality conscious shopper
- May understand online fraud
- May have fraud expert staff

- Interested in latest technology

- Will appreciate products that make their business more efficient

How to gain these leads?

- Paid Search – keywords that capture business owners who are unhappy with current service
- Business/Tech events
